NEXFLOW

PRE-SEED ROUND · 2026

INVESTOR DECK — HIGH LEVEL

The CRM the Gulf has been waiting for.

NexFlow is a sovereign, bilingual, AI-native CRM purpose-built for Saudi Arabia and the wider GCC — and the first credible alternative to Salesforce, HubSpot, and Zoho in the region.

RIYADH · KHOBAR · DUBAI

The Gulf runs on WhatsApp and spreadsheets — not CRM.

Imported tools were built for English-first North American workflows. They miss how teams here actually sell — and rep adoption never crosses 30%.

FRICTION

Arabic is bolted on, not native

RTL layouts break, Hijri dates are missing, and Arabic search returns the wrong record.

REALITY

Real deals live in WhatsApp

No mainstream CRM treats WhatsApp as a first-class pipeline channel for the region.

RISK

Customer data leaves KSA

PDPL and Vision 2030 sovereignty rules push enterprises toward local hosting — current CRMs cannot guarantee it.

A multi-billion-dollar CRM market with no regional incumbent.

Saudi Arabia's $24B+ Vision 2030 tech budget is concentrated in cloud, AI, and sovereign software — exactly where NexFlow plays.

TAM

$2.1B

GCC SaaS CRM spend by 2028 across enterprise, mid-market, and SMB.

SAM

$680M

KSA + UAE mid-market and enterprise sales teams ready for an Arabic-first, AI-native CRM.

SOM (Y3)

$110M

19,200 paying customers (~192,000 seats) by Year 3 — about 16% of the SAM at our blended ARPU.

A bilingual, AI-native CRM that runs on Saudi soil.

PILLAR 01

Bilingual AI Copilot

Drafts, summaries, and call notes in Arabic and English — trained on regional sales language.

PILLAR 02

WhatsApp-First Pipeline

Conversations sync into the deal record automatically — no double entry, no lost context.

PILLAR 03

Sovereign Hosting

Deployed in KSA region with PDPL compliance and full data residency by default.

PILLAR 04

Built for the Region

Hijri calendar, prayer-time scheduling, ZATCA-aware quoting, and Gulf workflows out of the box.

A 24-month window that won't open again.

Three forces — sovereignty, AI, and budget — line up at the same moment in the same region. We are building the CRM that owns it.

01

Sovereignty mandate

PDPL, NCA controls, and Vision 2030 are pushing every regulated buyer toward locally-hosted SaaS — fast.

02

AI inflection

Bilingual LLMs are finally good enough to do real CRM work in Arabic. Two years ago they were not.

03

Budget redirect

PIF and ministry RFPs explicitly reward Saudi-owned IP — incumbents cannot retrofit national alignment.

Predictable per-seat revenue. Premium ARPU as we move upmarket.

STARTER

$19 / seat / mo

SMB sales teams. Bilingual CRM core, WhatsApp inbox, basic AI copilot.

PROFESSIONAL · BUSINESS

$79–129 / seat / mo

Mid-market. Pipeline forecasting, advanced AI Hub, full integrations, ZATCA quoting.

ENTERPRISE · SOVEREIGN

$199–299 / seat / mo

Enterprise & government, tiered by seat band. Single-tenant KSA hosting, audit, SSO, custom AI tuning.

Y1 ARPU $59.10 · Starter 50% of mix

Y2 ARPU $69.75 · Pro+Business become majority

Y3 ARPU $77.40 · Enterprise mix grows fastest

Land in real-estate and clinics. Expand to every regulated SMB.

YEAR 1 — WEDGE

Real-estate brokers & private clinics in Riyadh

High WhatsApp dependency, fast sales cycles, painful spreadsheets. We win 1,200 customers (~6,000 seats) through founder-led sales and design-partner case studies.

YEAR 2 — EXPAND

Logistics, automotive, professional services

Repeatable industry plays. We bring in two account executives, partner with 4 regional system integrators, and scale to 6,200 customers (~43,400 seats).

YEAR 3 — ENTERPRISE

Banks, telcos, ministries, PIF portfolio

Sovereign-tier deals. UAE expansion, channel program with the integrators, and 19,200 paying customers (~192,000 seats) by year-end.

MVP shipped. 20 design-partner interviews. First paying seats inside Q+2.

NOW

MVP live

Web + mobile, bilingual core, WhatsApp inbox, AI copilot v1 — all shipped pre-funding.

MONTHS 1–3

20 design-partner interviews

Phase-1 plan from the feasibility study; weekly product feedback loop with GCC operators.

MONTHS 4–6

10 paid beta customers

Phase-2 launch: Product Hunt + HN Show HN + LinkedIn MENA sponsored, per the marketing plan.

Y1 EXIT

1,200 customers · $4.26M ARR

Per the model: 150/250/350/450 quarterly cohorts at 5 seats avg, $59.10 blended ARPU.

Salesforce, HubSpot, and Zoho cannot become Saudi.

They will compete on logos and price. We compete on geography, language, and trust — three moats they cannot retrofit.

CAPABILITY	SALESFORCE	HUBSPOT	ZOHO	NEXFLOW
Arabic-native UI & search	Bolted on	Partial	Partial	Native
WhatsApp as first-class channel	No	Add-on	Add-on	Core
KSA data residency by default	Roadmap	No	No	Default
Hijri / prayer-time / ZATCA logic	No	No	No	Built in

From $4.3M ARR to $178M ARR in 36 months — at 80%+ gross margin.

METRIC	YEAR 1	YEAR 2	YEAR 3
Paying customers (year-end)	1,200	6,200	19,200
Paying seats (year-end)	6,000	43,400	192,000
Blended ARPU (per seat / mo)	$59.10	$69.75	$77.40
ARR (year-end)	$4.26M	$36.33M	$178.33M
Recognized revenue	$1.68M	$19.72M	$110.66M
Gross margin	77%	79%	81%
EBITDA	$1.23M	$15.42M	$89.23M
Net income	**$0.98M**	**$12.34M**	**$71.38M**

All figures reconcile line-for-line with the NexFlow financial model (USD, fiscal calendar).

A founding team that has shipped CRM, sold to Saudi enterprises, and lived in Riyadh.

The single non-negotiable for this market is having Arabic, Saudi work culture, and enterprise sales motion in the same room. We do.

FOUNDER & CEO

Product, sales, and Saudi market

15 years across enterprise SaaS in MENA — closed seven-figure CRM contracts with banks, telcos, and ministries before building NexFlow.

FOUNDING ENGINEERING

CRM platform & bilingual AI

Senior engineers from regional fintech and global SaaS — depth in multi-tenant SaaS, Arabic NLP, and WhatsApp Business APIs.

ADVISORS

Vision 2030 operators

PIF-portfolio CIOs, Saudi enterprise GMs, and a former Salesforce MENA leader guiding GTM and channel strategy.

Raising $100K on a $1.5M pre-money SAFE.

Capital-efficient by design — enough to convert design partners, hire two AEs, and ship the Sovereign tier into a closed beta with Saudi enterprise.

ROUND SIZE

$100K

Pre-seed SAFE, no discount, post-money cap of $1.6M after the round.

PRE-MONEY

$1.5M

Investor stake of 6.25% on conversion; clean cap table, no prior outside capital.

RUNWAY

12 mo

Lean operating cost (~$70K Y1 OpEx) + revenue runway extends to 18+ months.

USE OF FUNDS

Hire 2 AEs · KSA hosting · Sovereign beta

Convert design partners, sign 2 enterprise pilots, prepare a $2M seed round in Q4.

Three exit scenarios. ~89x to ~200x MOIC after realistic dilution.

Reported MOIC range follows the feasibility study: $100K SAFE diluted ~10x through Series A/B/C to ~0.625% at exit. The undiluted cap-table figure (no dilution) is shown alongside for completeness.

SCENARIO	Y3 ARR	MULTIPLE	EXIT VALUE	MOIC (DILUTED)	MOIC (UNDILUTED)
Conservative — regional acquisition	$178M	8x	$1.43B	~89x	~891x
Base — strategic acquisition	$178M	12x	$2.14B	~134x	~1,337x
Upside — Tadawul IPO / global SaaS multiple	**$178M**	**18x**	**$3.21B**	**~200x**	~2,006x

Diluted MOIC assumes pre-seed stake diluted ~10x through subsequent Series A/B/C rounds (industry-standard for a SaaS company growing from $4M ARR to $178M ARR). Undiluted figures come straight from the financial model's Valuation tab.

The system of record for how the Gulf does business.

CRM is the wedge. The long arc is a sovereign revenue platform — sales, service, billing, and AI agents — owned by the region, in the region's languages, on the region's infrastructure.

2026 — CRM

Bilingual sales and pipeline. Win the Saudi mid-market.

2027 — REVENUE OS

Add service desk, ZATCA-native quoting, and bilingual customer portals.

2028 — AGENTIC GCC

Specialized AI agents that close, renew, and serve — sovereign by design.

JOIN US AT THE START OF THE GCC'S CRM

Where revenue learns to flow.
